- (c) Systematic approach to network design and management using internally developed best practices models *METTR(c)*.
- (d) 5 Million dollar, secure data center facility.
- (e) 15% capacity of data center with positive cash flow.

Dear Jeff,

We have enjoyed working with your organization over the years. You and your staff have always provided courteous service and excellent support.

As our business has grown Visions Communications has always been able meet and exceed our expectations in providing comprehensive solutions. Your sensitivity to budgetary needs has been greatly appreciated. With our growth, we are adding a few field offices, both here locally in the Cincinnati area and also in the Atlanta, Georgia area. VOIP was a great solution for us. We have been extremely pleased with the VOIP solution that you have put together for us and helped install.

We look forward to many more years of fine service and support.

Sincerely,

Mike Walter
System Engineer
