Hello Jeff;

I have no problem recommending your company to a prospective client. Your group proposed, installed, and implemented an excellent solution for our new facility. The solution utilized our old Comdial phones where appropriate and blended in new hardware where needed to bring it all up to the latest technology, and it has all worked perfectly.

I can give no server higher praise than to say that I occasionally forget it exists. I can say that I have totally forgotten your phone server is in our rack; it always works and never requires attention. I wish everything worked as well as your technology.

Best regards;

Joe Luther
